Revolutionary Volume Lighting

A new company, RVLV (Revolutionary Volume Lighting Visions) has opened for business to sell updated versions of tea lanterns. They contacted me because they know I have amazing AP Calculus students that have their fingers on the pulse of not only mathematics, but on the aesthetics of modern lighting.

They want to create tea lanterns that have a hollow core, but are completely filled around with a honeycombed-style amount of paper. They have asked for prototypes of new modern designs with specs for the volume of material they need to purchase, so that they can make design decisions for their line of products.

Your boss (and I think you know who I mean), has written up a list of tasks for you to complete so that we be paid.
